# YARN:
# Your Augmented Reality Notes
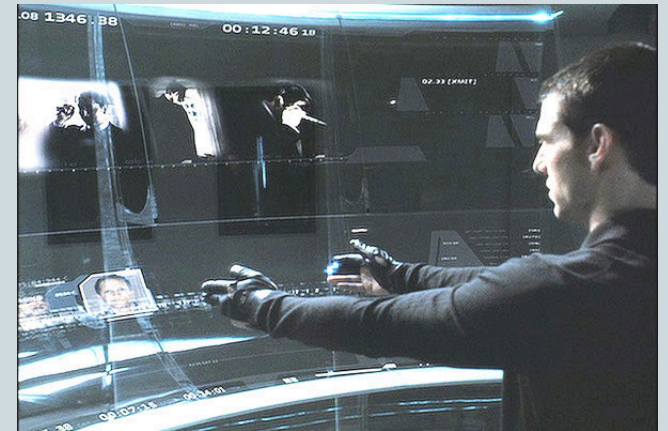

## "IT'S THE REAL WORLD—
## ONLY BETTER."
## -JAY WRIGHT, QUALCOMM.

# Motivation

- Virtual and augmented realities are the future.
- Alter your perception and senses.
- Digitally manipulate your environment.
- Annotate your world.

# Team

- **Ben Shih**
  - Robotics exchange @ EPFL.
  - MS Electrical Engineering @ Carnegie Mellon University.
- **Diego Ballesteros**
  - MS Computer Science @ ETH Zurich.
- **Cifong Kang**
  - MS Media Informatics @ RWTH Aachen.
- **Brian Li**
  - Computer Science exchange @ EPFL.
  - BS Civil Engineering @ University of Illinois at Urbana-Champaign.

# Proof of Concept

- Scrawl on virtual world using Oculus Rift + Leap Motion.

- Upload to Evernote with a flick of your wrist.

- Read your annotations in the real world on your phone.

- Reversible process!

# Growth Potential

- Potential as the next major computing platform after mobile.

- 1.2 billion personal computers, 5.2 billion mobile devices. Imagine what's next.

- Huge opportunities in software.

- Huge opportunities in hardware.

- Timing is everything, and timing is right.

# Summary

- We are building your digital future.
- Invest in us – we get stuff done.
- Come play with our demo.
- Vast room to grow for mainstream adoption.
